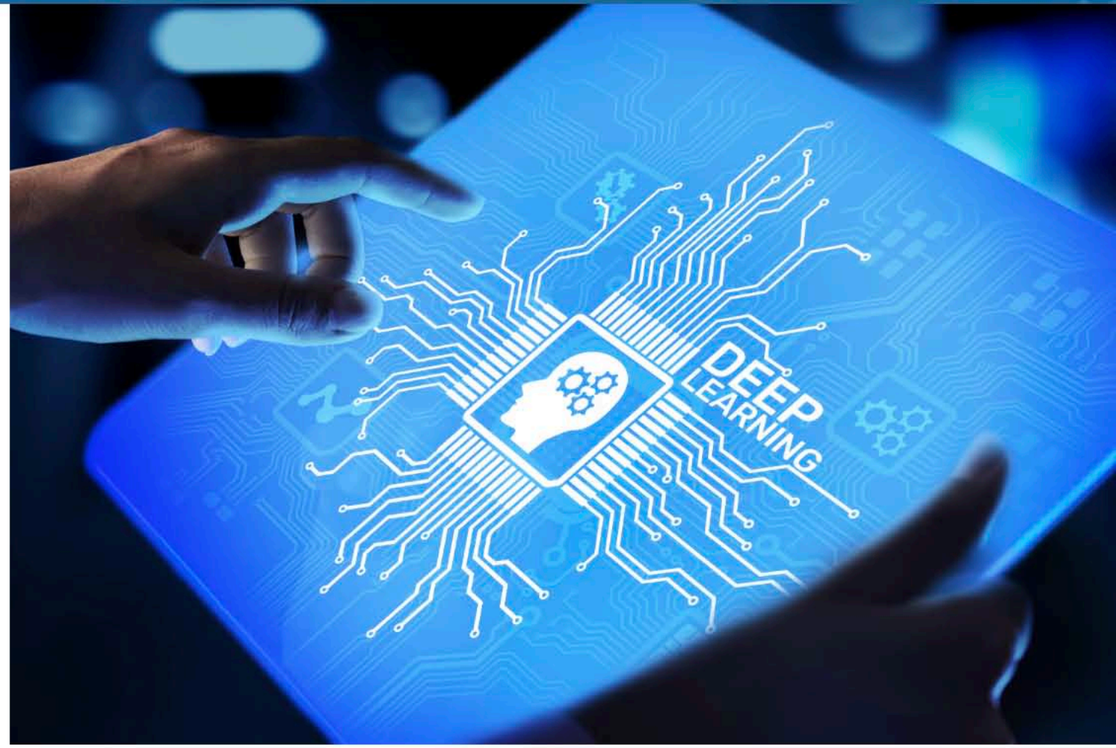
Webinar:
Step Into The Future with
M.Sc. in Artificial Intelligence & Machine Learning Ops
A Panel Discussion

Accelerate your career with industry-ready machine learning & data science skills

With every industry looking to apply AI, Machine Learning, and Data Science in their domain, the skill is becoming the brain behind business. Most data scientists and AI & ML professionals work in the technology industry. Other options include marketing, consulting, healthcare and pharmaceuticals, finance, government, gaming, and many more.

The Master of Science in Artificial Intelligence and Machine Learning Ops is designed to provide deep technical training to the student in the field of Artificial Intelligence and Machine Learning.

Join industry thought leaders from NMIMS Global Access & INSOFE in a panel discussion on how you can advance your career for the most coveted profession in the world today.



Speakers

Leading business thinkers from academia and industry, to give you dynamic mix of theory and business practices*
