IFIP FULL MEMBER SOCIETY REPORT 2018-2019 to the General Assembly, Kiev (Ukraine)

1. The SI (Swiss Informatics Society), the Swiss IFIP Member

The **Swiss IFIP Committee (SIC)** is (since September 2011) one of the Working Groups of the SI (Swiss Informatics Society) which is as of now the new Swiss Member of IFIP.

SIC members are the Swiss delegates to the IFIP General Assembly and to the IFIP Technical Committees.

They meet once a year to discuss the annual reports of the TC rep's, the past and future activities, the participation in Swiss associations and events, and also issues with IFIP and its TC's, etc.

This chapter describes briefly the IFIP Federation recent activities and its various bodies, various aspects of the Swiss participation and contributions to IFIP, the associated amount of efforts and also tries to emphasize the value for Switzerland of this participation.

Very active in IFIP since its creation in 1960 and although not part of the European Community, **Switzerland** has not only been a founder of IFIP but has continued to contribute towards its objectives and activities without interruption through the personal involvement of its representatives:

- active presence in the Executive Board and the Council and 3 Presidents covering a period of 12 years.
- B. Morel, Swiss representative to the IFIP GA since 1999, has been Board Member and Councillor from 2004 to 2010, actually member of the IFIP ILC (International Liaison Committee), of IP3 Board and of the new MSA (Member Societies Assembly), and DEC (Digital Equity Committee)
- Strong and active Swiss presence in the Technical Committees and Working Groups dealing with matters of interest to Switzerland.
- Swiss Honorary Members of IFIP: Kurt Bauknecht, Pierre-André Bobillier

Today, ca **80 specialists** from Swiss Academia and industry are participating in **11 TC's** and **ca 40 WG's.**, with 2 reps who are also special consultants.

The TC representatives are appointed by SI Board, the Swiss Member of IFIP since 2011. P.-A Bobillier, past IFIP President is in charge for preparing election and renewal of these delegates.

The WG members are individual specialists accepted by the WG's for their expertise (there is no country limitation on their number).

The personal involvement and the efforts of these specialists contribute, through their international contacts with leading experts, to acquiring and bringing to Switzerland knowledge on new technology developments and strategies discussed within IFIP Working Groups. They are the ambassadors of Switzerland to the TC's and WG's and contribute to the maintenance and improvement of the Swiss international image.

This is especially true in areas such as Education, Communications (infrastructure, access, etc.), Security, Software, Human aspects, etc. which present important potential for Switzerland.

Support for these international activities is therefore very important to allow the continuation of an active Swiss participation in the international IFIP activities in all areas of ICT.

2. The Swiss IFIP Committee (SIC)

The Swiss IFIP Committee (SIC) is (since September 2011) one of the Working Groups of the SI (Swiss Informatics Society) which is now the new Swiss Member of IFIP.

SIC members are the Swiss delegates to the IFIP General Assembly and to the IFIP Technical Committees.

It meets once a year to discuss the annual reports of the TC rep's, past and future activities, participation in Swiss associations and events, issues with IFIP and its TC's, etc.

<http://www.ict-21.ch/SIC/spip.php?rubrique2>

Yearly spendings of Swiss IFIP delegates :

in order to get an evaluation of the importance of resources spent by IFIP delegates to TC's and WG's a survey is repeated on a regular basis. The delegates are asked how much they spend annually in:

- Person days (meeting attendance, home work, reports, meeting preparation, etc.) and
- Travel expenses (airline/train tickets, hotel and meals, registration fees or receptions for invitees, etc.)

The numbers vary significantly; for example, the time spent varies from 5 to 50 days/year. The maximum happens when the TC rep has several IFIP functions (for example Council Member, TC Officer, etc..) or when in charge of organising an IFIP event in Switzerland. The last detailed evaluation was done for the year 2010.

Total expenses per TC/WG representative were 16.3 kfr/person/year

As of December 2013, 82 specialists from Swiss Academia and industry were participating in 10 TC's and 39 WG's.

This represents a total Swiss effort of approximately 1'336'600 fr/year of which 140 kfr for airline tickets.

These activities would obviously be impossible without the IFIP delegates employers. They however

AI-for-Good-Global-Summit-28-31-May-2019-Geneva (status)

AI for Good Global Summit (28-31 May 2019, Geneva, Switzerland)

The third edition of the Artificial Intelligence (AI) for Good Global Summit, will take place from 28 to 31 May 2019 at the International Conference Centre Geneva (CICG) in Geneva, Switzerland. The event is organized by ITU in partnership with XPRIZE Foundation, Association for Computing Machinery (ACM) and over 30 sister United Nations (UN) agencies.

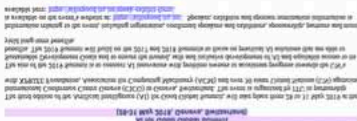

The aim of the 2019 Summit is to connect AI innovators with problem owners to accelerate progress towards the UN's Sustainable Development Goals and to ensure the trusted, safe and inclusive development of AI and equitable access to its benefits. The 2019 Summit will build on the 2017 and 2018 Summits to focus on practical AI solutions that are able to yield long-term benefits.

Information relating to the event, including registration, confirmed speakers and exhibitors, sponsorship, partners and more is available on the event's website at: <https://aiforgood.itu.int/>. Speaker, exhibitor and sponsor nomination information is available here: <https://aiforgood.itu.int/speak-exhibit-form/>.

Panel discussion on Priority Theme 2- The role of science, technology and innovation in building resilient communities, including through the contribution of citizen science
15 May 2019, 10 a.m.

United Nations Commission on Science and Technology for Development (CSTD)
Twenty-second Annual Session

Panel discussion on Priority Theme 2: The role of science, technology and innovation in building resilient communities, including through the contribution of citizen science

15 May 2019, 10 a.m.

Room XVII, E-building, Palais des Nations

Concept Note

1. Background

At its twentieth-first session, held in Geneva, Switzerland in May 2018, the Commission on Science and Technology for Development selected “The role of science, technology and innovation in building resilient communities, including through the contribution of citizen science” as one of its two priority themes for the 2018–2019 intersessional period. In this context, the Commission will convene on the morning of Wednesday, 15 May 2019, a panel discussion on that priority theme to contribute to its better understanding and to assist the Commission in its deliberations at its twenty-second session.

At the beginning of the panel, the secretariat of the Commission will introduce the Report of the Secretary-General on that priority theme, which was prepared based on contributions by the UN system, country case studies by Commission members, relevant literature and other sources. The Report notes that people around the world are continuously affected by shocks; therefore, building resilience is critical for sustainable development. Resilient communities empower their people to absorb and adapt to shocks, have economies that can self-organize to continue functioning at times of crises, and are able to carry out all their activities without harming the environment. Science, technology and innovation (STI) have a critical role to play in each one of these dimensions. Digital technologies have empowered and given voice to people; innovation results in economic diversification, which increases the ability of economies to adapt to shocks; and new technologies are used for resource management and could help to decouple economic development from environmental degradation. A new development is citizen science, which uses new technologies to engage volunteers to carry-out tasks such as data collection in support of science.

CSTD Side-Event – Artificial Intelligence, Ethics and the Developing World

14 May 2019
14:00-15:00 hrs., Room XXVI, Palais des Nations
Geneva, Switzerland

Key Issues

Side Event of the International Federation for Information Processing (IFIP)

Questions to be addressed:

- How is the current wave of AI innovation likely to impact poor countries?
- What policies may improve the capacity of developing countries to benefit from AI innovation?
- Do you really want a computer to make ethical decisions like you do or should they follow purely logically a set of fixed rules?
- If human beings have even occasional minor moral weaknesses; from whom should an autonomous artificial intelligence learn its ethics?

Oser le nouveau paradigme des ODD (=) de la vision aux réalisations-Mardi 4 juin 2019-ONU Genève

<https://sisr.swissinformatics.org/wp-content/uploads/sites/28/2019/06/Oser-le-nouveau-paradigme-des-ODD-de-la-vision-aux-realisation-Mardi-4-juin-2019-ONU-Genève.pdf>

Colloque international

organisé par UNESU & AIODD

Oser le nouveau paradigme des ODD : de la vision aux réalisations

Mardi 4 juin 2019

ONU Genève, Salle XXIV

Contexte et objectifs

La pleine réalisation des Objectifs de Développement Durable (ODD) appelle à s'engager sur la voie d'un nouveau paradigme fondé sur la conscience d'un triple impératif : relever les défis écologiques, refonder le vivre ensemble et promouvoir de nouvelles formes de prospérité. Il s'agit de sortir d'un monde dominé par le gaspillage des ressources et l'individualisme et d'en faire advenir un nouveau, inspiré par le respect du vivant sous toutes ses formes, par une gouvernance éthique et la créativité pour le changement de nos modes de production et de consommation. Cette année le Maroc sera à l'honneur, au regard de certaines actions exemplaires et engagement en faveur du développement durable.

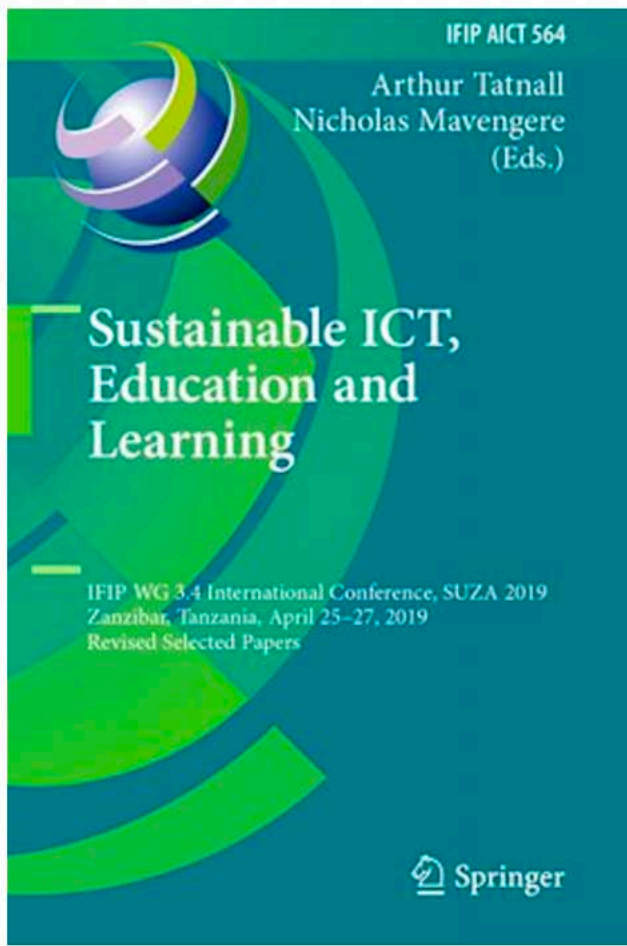

Dans cet esprit, le colloque se fixe trois objectifs :

- Apporter un éclairage sur le nouveau paradigme qui inspire la conception et la mise en œuvre des ODD,
- Identifier les structures à mettre en place et mobiliser les acteurs institutionnels pour s'engager dans les transformations sociétales que nécessite ce nouveau paradigme,
- Mettre en valeur des actions exemplaires impulsant ces transformations et contribuant à la réalisation effective des ODD (expériences de terrain et actions de plaidoyer).

Towards a Zanzibar Declaration on Sustainable ICT, Education and Learning. Draft 1 mid of September

Towards a **Zanzibar Declaration** on
Sustainable ICT, Education and Learning. *Draft 1 mid of September*

Among all perturbations, changes and problems observed during the last decades, the main fact is certainly that we are not in a STATIC world anymore, but in a DYNAMIC world. It generates a numerous of disruptions in various domains and education right in the middle of the target everywhere. Concerning the educational field, we can consider different other factors like changes in pedagogy, demands from the societies, emergence of new technologies.
