Isn't this amazing how this works? Maybe this is why
our kids do so well
in school?

According to a research at Cambridge University, it
doesn't matter in what order the letters in a word
are, the only important thing is that the first and
last letter be at the right place. The rest can be a
total mess and you can still read it without problem.
This is because the human mind does not read every
letter by itself, but the word as a whole. Finally
amazing huh?
